

# Knock-down Air Handlers

*Built on Site, on Your Schedule, for Your Specific Job Requirements*

## Pick Your Perfect Solution

The air handler brands of Nortek Air Solutions offer two options of Knock-down Air Handlers for tight spaces and tight installation schedules. In 30+ years of making custom air handlers we've perfected the design of knock-down units based on feedback from our customers. Knock-down construction means the unit is specifically designed and manufactured to fit through your field opening and meet your weight constraints. The result — faster field installation of a high quality, site-built air handler.

### Knock-down Air Handler Option #1

- Partly assembled casing panels are carefully crated and then shrink-wrapped for protection during shipment
- Crates are tagged and labeled for easy identification and assembly at the job site
- 3-D drawings and assembly instructions provided
- Pre-assembled casing panels per field constraints, i.e., size and weight; reduce field assembly time required

### Rapid Knock-down Air Handler Option #2

- Units are built in sections in the factory, with the sections properly sized for field disassembly
- Components can be sized in shape and weight
- Our unit design makes it easy to remove any of the exterior panels if needed, while providing the structural advantages of a "Framed Unit"
- Only the minimum hardware necessary to secure the unit panels for shipment is installed

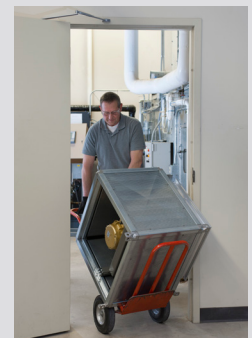

Our patented FANWALL® system is available in several options for your air handler—one is sure to fit your job requirements.

# We're Serious about Knock-down, Site-built Air Handlers — from Design to Delivery

## Design and Selection

Knock-down Construction is a selectable configuration in our Nortek Air Solutions Design Assistant (NASDA) product selection program. Options include the following.

- Field: Rapid Knock-down in modules, Option #2 shown on front page
- None: meaning standard construction, without any Knock-down configuration
- Standard Knock-down: shown in Option #1 on front page
- Quick ship: consult factory for details

## Documentation

Our Knock-down Air Handlers come with a complete set of 3D drawings and assembly instructions with each unit.

We also offer factory visits where you can verify the quality and configuration of your knockdown air handler.

## Delivery

Our Knock-down Air Handlers arrive at the jobsite ready for final assembly
